Size Certification & Acknowledgement: Please double-check your provided measurements. Spa covers are custom made to your PROVIDED MEASUREMENTS. Spa covers are non-refundable. If ordering solely by make and model, you are agreeing to accept the measurements as we have them in our database. It is highly recommended to NOT place an order without also providing physical measurements. We reserve the right to reject any order that does not have accompanying physical measurements. Spa covers will not be made smaller than the required size; however, due to the nature of our manufacturing process, covers may measure up to 1" larger than required size.

I have read and agree to the statements above and have verified the provided measurements to be accurate.

ROUND CORNER – RADIUS CORNER MEASURING GUIDE:

To measure the radius (F) of a rounded corner shaped spa, extend two lines from where the curve starts on two sides of the spa (Point B) until they meet, creating an imaginary 90-degree corner (Point A).

The distance between the start of the curve (Point B) and the imaginary square corner (Point A) is the radius of the rounded corner (Measurement F).
